

# 075-190 Unimotor FM performance data

## For 3 Phase VPWM Drives 200-240Vrms

**Δt = 100 °C winding 40 °C Max ambient**

Stall torque; rated torque and power relate to maximum continuous operation tested in a 20 °C ambient at 12kHz drive switching frequency

All other figures relate to a 20 °C motor temperature

Maximum intermittent winding temperature is 140 °C

data subject to +/-10% tolerance

<b>Speed 2500 (rpm)</b>								
Rated speed (rpm)				1500	1500	1500		
Rated Torque (Nm)				62	70	77		
Stall Current (A)				43.0	54.2	63.6		
Rated Power (kW)				9.7	11	12.1		
R (ph-ph) (Ohms)				0.09	0.08	0.06		
L (ph-ph) (mH)				3.5	3.1	2.6		

The Unimotor fm 250 servo motor has been designed to give greatest motor efficiency up to a rated or rms speed of 1500 rpm. The range does include the optional speeds of 2000rpm and 2500rpm. These windings will allow the end user to enter the intermittent speed zone as well as the intermittent torque zone on the 250 motor.

These higher speed windings are designed with optimum kt values that allow increased speed without demanding very high currents.

The Unimotor fm 250 is designed for S2 to S6 duties and as such the rms values play an important part in the motor selection for torque and speed.
