

J3 Series & New J3C Series

Doc: J3-Cat/Rev07

Aug 2011

Feature rich J+J multi-voltage electric actuator with LED status light and plug & play accessories.

New in 2008, the **J3** range of electric valve actuators takes its highly successful predecessor, the J2 range, to the next level.

With an all new, rugged weatherproof and anti-corrosive Polyamide housing, the **J3** offers more user-friendly features than the J2, and introduces a highly visible LED status light.

This visual indicator shows whether the electrical actuator is operating correctly, or has tripped out either by its electronic torque limiter, or has been left in 'manual' mode.

Site operators are no longer left with the 'valve or actuator?' question when an electric valve actuator doesn't respond to a signal.

New in 2011 the **J3C** was introduced which has an all new dome position indicator and improved ingress protection to IP67.

The **J3** is quick and easy to install, with ISO:5211 multi-flange mounting and a double square drive, allowing fast mounting to ISO:5211 valves. There is no need to remove the

cover to connect the **J3** electrically, saving installation time.

Using the external DIN plugs and external wiring diagrams supplied with the actuator, installations can be pre-wired.

Protection against valve jams is provided by an electronic torque limiter, which auto-relaxes the gearbox when activated, allowing the manual override to be selected to assist in clearing the jam.

The effect of condensation is eliminated by an internal thermostatic anti-condensation heater that does not require a separate independent power supply.

Standard function for the **J3** is power open, power close, stays put on power failure.

New to the **J3** are plug and play accessories –the function can be changed to either failsafe or modulating by fitting the new plug and play conversion kits.

The modulating kit has the new digital positioner that offers auto-calibrating and self resetting functionality.

These conversion kits are available as optional extras.

The **J3** is a very smart red box!

J3/J3C Status light functions:

Constantly lit LED

If the actuator is operating correctly with no faults, the LED shows a constantly lit light.

The LED flashes with 2 blinks

If the actuator has been left in 'manual' mode, the actuator's motor runs but doesn't drive the output shaft. After a pre-set time, the actuator knows that as the torque limiter has not activated and that the motor is running, it must be in manual.

The LED flashes on/ off

When the actuator senses an impending valve jam, the electronic torque limiter is activated and on activation, repeatedly flashes the LED on and off.

Quick guide to the **J3**'s standard features :

Multi-voltage with auto-voltage sensing.

'L' 12 ~ 24V AC or DC
'H' 110 ~ 240V AC or DC

LED Status light to indicate operational status of actuator

Electronic over-torque protection against valve jams

Thermostatic anti-condensation heater

Manual override for emergency hand operation

2 Volt free end of travel confirmation switches

IP65 (J3) or IP67 (J3C) weather-proof anti-corrosive and UV protected Polyamide housing

Local visual position indicator

ISO5211 multi-flange mounting with double square drive

All external electrical connections via supplied DIN plugs

CE marked

ISO 9000 manufacturer

Failsafe and digital positioner plug & play kits available.

J3**Type J3 & J3C Models 20 ~ 85**

Specifications:

	Model 20		Model 35		Model 55		Model 85	
	L20	H20	L35	H35	L55	H55	L85	H85

Optional extras:

BSR kit

DPS kit

Failsafe (BSR) Standard on/off version can be converted to failsafe using a plug & play conversion kit. Failsafe achieved with the use of industrial re-chargeable batteries & charger PCB which are supplied with the BSR conversion kit.

Modulating (DPS) Standard on/off actuator can be converted to modulating using a plug and play conversion kit. The modulating function is achieved with a self calibrating digital positioner (either 0-10V or 4-20mA I/O) supplied with the DPS conversion kit.

Failsafe & Modulating (BSR+DPS) Install both kits !
